Summary

I'm looking for a Junior Front-End Developer job in Lviv.

Work experience

MobiDev
February 2014 – July 2014

- Cross-browser web page markup oriented on modern browsers.
- Adaptive markup for mobile phones and tablets, incl. CSS3 usage.
- Attaching ready-made plugins, creating minor jQuery scripts.
- Correcting markup mistakes and finalyzing ready-made websites and applications.
- Working with such CSS frameworks as Bootstrap and Topcoat.

Most projects I made are not yet on the web. That's why my Team Leader suggested to provide any necessary information and employment recomendations in case of need.
.

Freelance
February 2014 – July 2014

- Cross-browser markup, incl. projects for IE8.
- Introducing changes to ready-made templates.
